

Dear Sir or Madam,

It is my pleasure to acquaint you with one of my most outstanding students, Angsuman Das, who is keen to pursue the Doctor of Philosophy in at your esteemed institution.

I have known Ravi since 2010, when he enrolled into the Master of Science in zoology here at Rajiv Gandhi University. As part of this programme, Ravi took my course on Biochemistry and Entomology and joined my practical classes. I also supervised him for his Masters project, prospecting of Lepidopteran Silkworms.

Angsuman presented outstanding commitment to his studies, and finished his degree within the top 10% of his class. He was a quite remarkable student with a strong research interest. Among his peers, he stood out by always being up-to-date with currently topical discussions even within niches of bioinformatics research. The quality of his research work on his project was compelling.

With his multicultural background and fluent proficiency of English, Hindi, Nepali and Assamese he was able to adapt to the cultural diversity of the campus. During the courses, he always made many valuable contributions to group discussions. Finally, it should not be left unmentioned that Angsuman is a very pleasant person to work with. I respect Ravi's decision to further pursue his specific research interests at your university, and I am confident that he will be a highly valuable addition to your PhD program, where he could develop and apply his extraordinary talents. Furthermore, I am certain that he would qualify for any means of financial aid that you could offer him, and I also strongly recommend him for a position as a teaching or research assistant. Should you have any questions with regards to Angsuman Das, I will be pleased to answer them. Sincerely.

Jharna Chakravorty
Professor
Rajiv Gandhi University
HoD
Dept. of zoology
