

To whom it may concern,

It is with great pleasure that I give my recommendation for Angsuman Das in his bid to apply for your institution. One of my best students in Master in zoology. He is particularly keen on Biochemistry and has maintained a good GPA in his Bachelor classes too. His interests are also vast ranges from life sciences to social science fields.

Angsuman is a phenomenal young student. I have supervised him closely. I have been witnessing to his academic achievements from close quarters. I have been informed that Angsuman is applying for a specialized program at your institution and in the same regards, I recommend Angsuman for the program.

Angsuman has excelled in academics throughout masters. He is respected by her classmates. The teachers at the school see her as a model student.

Angsuman is a perfect fit for the program launched by your institution and I can say without any doubt that she will ace the program.

Regards,

Pankaj Kumar
